Profile

Software Engineering student with experience in Full-Stack development, Android, backend development, and applied Artificial Intelligence. Experienced with RAG systems, REST APIs, mobile automation, document processing, and AI-assisted platforms.

Experience

- Universidad EAFIT**, Artificial Intelligence Research Internship

- Contributed to an early-stage Hybrid Intelligence research project aimed at enabling people without prior expertise to perform complex tasks through active collaboration with AI.
 - Developed an experimental platform for electronic circuit assembly, transforming AI-interpreted schematics into valid breadboard layouts.
 - Designed the reasoning logic and step-by-step instruction generation used to guide users throughout the assembly process.

Medellín, Colombia
June 2026 – July 2026
2 months
- Inventer**, Software Engineering Intern

- Developed Android applications using Kotlin, Jetpack Compose, AccessibilityService, and MVVM architecture.
 - Implemented custom gestures, background services, floating interfaces, and system automation.
 - Developed backend services and REST APIs using Python, FastAPI, Node.js, and Express.js.
 - Contributed to a RAG platform using the OpenAI API, LangChain, Tesseract OCR, and Milvus.
 - Containerized services with Docker and collaborated on backend architecture and system integration.

León, Guanajuato, Mexico
Jan 2025 – Oct 2025
10 months
- Green World School**, Information Technology Intern

- Provided technical support and performed preventive and corrective maintenance on computer equipment.
 - Managed institutional systems, user accounts, and access permissions.

León, Guanajuato, Mexico
June 2024 – Aug 2024
3 months

Education

Universidad de La Salle Bajío, Software Engineering and Computer Systems León, Guanajuato, Mexico
Feb 2023 – present

Conferences and Presentations

- International Congress of the Delfín Program**

- Participated as a speaker at an international congress, presenting research results on Shared Reasoning.
 - Presented the AI-assisted electronic assembly project developed during my research internship at Universidad EAFIT.

Nuevo Nayarit, Nayarit, Mexico

2026

Skills

Technologies: Python, Java, Kotlin, JavaScript, TypeScript, C#, SQL, Angular, React, Svelte, Node.js, Express.js, FastAPI, Django, ASP.NET, Spring, Hibernate, Android SDK, Jetpack Compose, AccessibilityService, and MVVM.

AI and Data: OpenAI API, LangChain, Retrieval-Augmented Generation (RAG), Tesseract OCR, Milvus, Computer Vision, PostgreSQL, MySQL, SQL Server, MongoDB, and SQLite.

DevOps and Tools: Docker, Terraform, GitHub Actions, Linux, GitHub, Cypress, and Swagger/OpenAPI.

Languages: Native Spanish and B2 English.
