Profile

Software Engineering student with hands-on experience in Android development and AI-powered backend systems, including Accessibility Service-based applications and Retrieval-Augmented Generation (RAG) architectures. Currently seeking a professional internship opportunity where I can contribute to real-world software projects and continue growing as a software engineer.

Experience

- | | |
|--|----------------------------------|
| Green World School , IT intern | León, Guanajuato, México |
| <ul style="list-style-type: none">• Provided technical support to teaching and administrative staff, troubleshooting hardware and software issues.• Performed preventive and corrective maintenance on institutional equipment.• Managed and updated student and staff data within internal information systems.• Administered user accounts and access permissions for the institutional platform.• Assisted in maintaining network and device functionality across the organization. | June 2024 – Aug 2024
3 months |
| Inventer , Software Engineer Intern | León, Guanajuato, México |
| <ul style="list-style-type: none">• Developed an Android application implementing Accessibility Service APIs to detect and perform custom screen gestures.• Designed gesture-based interaction logic for system-level touch control.• Implemented permission handling and background services for overlay and accessibility features.• Contributed to the development of a Retrieval-Augmented Generation (RAG) backend system.• Integrated AI modules for document retrieval and context-enhanced response generation.• Assisted in backend architecture and API integration for AI-driven features. | Jan 2025 – Oct 2025
10 months |

Education

- | | |
|---|--------------------------|
| Universidad de la Salle Bajío , Software Engineering | León, Guanajuato, México |
| | Feb 2023 – present |
